CASE STUDY:
SPROUTE KID

The Starting Point

When we began our work with **Sproute Kid**, the store was virtually non-existent in the digital landscape. For the highly competitive "Badiyadka Kids Shop" niche, the profile was buried at **Position #16**. This meant that local customers actively searching for children's wear were being directed to competitors, resulting in lost foot traffic and revenue.

Initial Audit: Business ranked on Page 2, failing to appear in the Local Map Pack.

Market Dominance

Through a targeted SEO sprint involving profile optimization, keyword density adjustment, and local relevance boosting, we achieved a total turnaround. Within 4 days, Sproute Kid climbed 15 spots to secure the **#1 Ranking** in the area.

Current Status: Holding the primary spot in the Google Local Pack.

VISIBILITY LIFT

Real-World Growth

The ranking shift translated immediately into customer engagement. In the first 72 hours of peak visibility, the profile recorded a significant spike in interactions, including calls, direction requests, and website visits.
